Creation of Persistent Links

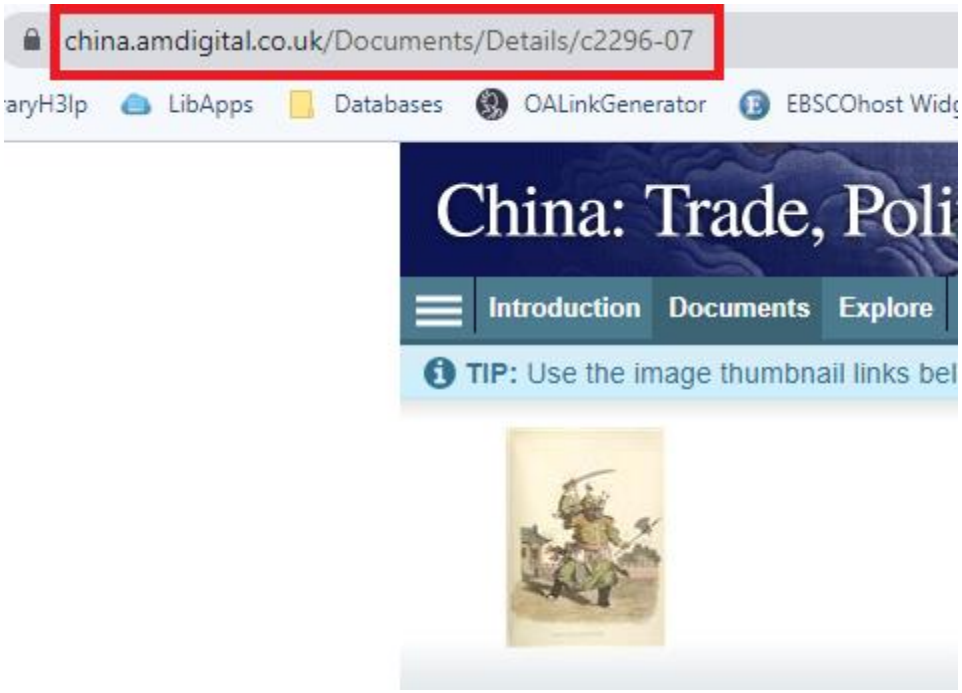
Adam Matthew Digital Collection

Persistent links direct students to specific full-text journal documents found in our research databases. These links are stable and can be accessed from both on and off campus. These links could be used for e-reserves, electronic reading lists or incorporating into Brightspace and other online course resources.

1. Each digital collection has a slightly different layout, but the creation of persistent link is the same.

2. Choose a content tab.

3. Select the item you want to link to and copy the url.



The link will look like this:
https://www.china.amdigital.co.uk/Documents/Details/c2296-07

Please note that this URL does not include the UFV Library OpenAthens server prefix, which is essential to providing off-campus access to the stable link.

4. Go to our OpenAthens Link Generator and paste in the link. Hit Copy.

5. The finished URL will look like this:
https://go.openathens.net/redirector/ufv.ca?url=https%3A%2F%2Fwww.china.amdigital.co.uk%2FDocuments%2FDetails%2Fc2296-07
